

Electro-Sensors, Inc. Releases New EZ-3/4in and the EZ-18mm Easy Mounts for Barrel-Type Sensors

Minnetonka, MN—Electro-Sensors, Inc. announces the release of the EZ-3/4in and EZ-18mm Easy Mount Bracket Assemblies, which are used with Electro-Sensors speed sensors to generate pulses or 4-20 mA signals for use with display meters, speed switches, or PLC inputs. The EZ-18mm and EZ-3/4in easily mount directly into the tapped shaft so no other mounting brackets are needed.

A Pulser Disc is provided within each CPVC housing and provides the standard 8 pulses per revolution. The EZ-3/4in and the EZ-18mm Bracket Assemblies are designed for applications up to 300 rpm.

Sensors are sold separately

EZ-3/4in compatible sensors include the Electro-Sensors 906 and 932.

EZ-18mm compatible sensors include the Electro-Sensors ST420, ST420-LT, ST420-DI, Series 18, and the SpeedTalker DN-BH.

Electro-Sensors, Inc. is a leading manufacturer of machine monitoring sensors and hazard monitoring systems. Since 1968, we have been delivering the most rugged and reliable machine monitoring solutions to customers world-wide. We pride ourselves on supplying easy-to-install, complete systems designed to last for many years of accurate service.
