

- Accurate position feedback — 0° up to 130°
- Precisely measures valve shaft rotary movement
- Works on powered or manually driven valve shafts
- Interface with PLC or optional PM 500 Remote Display Unit
- Class I, Div I (C, D) Class II, Div I (E, F, G)

Description

Electro-Sensors SG1000E Sub-Turn Shaft Position Monitor is a complete position monitoring system housed in a compact and rugged explosionproof NEMA 4X housing. It is an encoder-based position sensor providing a 4-20 mA output and is used to measure a rotary process such as a shaft position having a clockwise or counter-clockwise rotary movement. The SG1000E works on rotary processes having a full-scale sweep as small as 5.6 degrees (fully-closed to fully-open), up through those having a full-scale sweep as large as 130 degrees.

Principle Of Operation

The SG1000E has two modes: calibration and normal operating. After installation, a simple calibration procedure is used to program the SG1000E with the encoder values corresponding to the shaft's fully-closed and fully-open position limits. Once programmed, the SG1000E outputs a 4 mA DC signal when the shaft is in the fully-closed position, and outputs a 20 mA DC signal when the shaft is in the fully-open position. When the shaft is at any mid-span position (between fully-closed and fully-open) the SG1000E outputs a signal that is proportionally between 4 and 20 mA.

Dimensions

Installation Figure 1

Product Specifications

Input Power	
Voltage	24 VDC \pm 10%
Output	
Type	4-20 mA standard
General Specifications	
Calibration Span	Minimum: 5.6° Maximum: 130°
Resolution	0.2% to 5% dependent upon calibration span
Installation	Center drill and tap the shaft to a depth of 0.625" for a 3/8" - 16 UNC thread. The use of a stabilizer bracket is recommended, but may not be required in all applications.
Operating Temperature	-40 °C to + 65 °C (-40 °F to 149 °F)
Terminal Block Wiring	10 feet of 3-conductor shielded cable - standard TB1-1 Red = Supply TB1-2 Clear = 4-20 mA TB1-3 Black = Ground Shield Wire
Material	Cast Aluminum
Enclosure Rating	NEMA 4X

Specifications subject to change without notice.

Ordering

All models come with a standard bracket for mounting.

Model Description	Part Number
SG1000E Valve Position Sensor	800-010400

Options

Optional remote slide gate display.

Options	Part Number
PM500, 115 VAC	800-004300
PM500, 230 VAC	991-000020
PM500, With 2 Relays	991-000021
PM500, With Analog Output	991-00023

Ordering

All models come with a standard bracket for mounting.

Model Description	Part Number
SG1000E Valve Position Sensor	800-010400

Customization

If one of our standard products does not meet your specifications, please call one of our applications specialists. Many of our products can be customized to fit specific needs.

Additional Information

For more information about product, please refer to SG1000E Installations and Operating Manual.
